Compare key features and prices for each of our campervan models. We also provide a list of optional extras to personalise your campervan.

ABOUT US

We strive to build the UK's finest campers and give the best customer service.

We've been making luxury campervans for over 23 years and during this time we developed a reputation for creating some of the finest campervans on the market.

We have a clear focus based around four simple principles: Quality, Safety, Style and Innovation.

It's with this clear vision that we can concentrate on bringing our customers the very latest designs, built to the highest standards, with the latest features and innovations.

VCA National Small Series
Type Approval (NSSTA)
e11*NKS*1551*00t

Vehicle Type Approval

We are one of only a few conversion companies to invest in National Series Small Type Approval (or NSSTA). This means that each model we produce has been tested against specific performance standards set out by the Vehicle Certification Agency (VCA).

This includes rigorous crash testing to ensure the structure of the vehicle and the seating systems are not compromised as a result of changes made to the base vehicle during the conversion process.

ISO9001:2008 Certified
Cert. No. 11340

ISO 9001:2008 Quality Management System

We have also invested in the British Standards Institute (BSI) ISO 9001:2008 Quality Management System (QMS).

This standard is based on a number of quality management principles including a strong customer focus, the continual improvement of products and the ability to provide consistent products and services. It ensures that the process from placing an order, production of your campervan and final handover are documented and carried out correctly.

www.voscentre.com

100% British Built

Whilst the name 'Autohaus' is German, our campervans are 100% British built in Minehead, Somerset.

Our furniture is designed and built by skilled craftsmen using the very latest CNC machinery to ensure accuracy and consistency. We use the best roof and seatbed systems along with our own electrical, water and gas systems.

When you buy an Autohaus you can guarantee you will receive a luxury campervan, built with your own specification, to strict safety and quality standards.

TONY PAYNE Managing Director

ASHTON 94

JUST GETS BETTER

CLASSIC DESIGN

The Ashton '94 was inspired by the very first campervans we built when the business was started back in 1994. We decided to introduce a base model, using the same furniture layout as these earlier models, but built using modern materials and appliances.

The vehicle is based upon the VW T6 102 BHP Startline Transporter with 5 speed manual gearbox, air conditioning, glazed tailgate and comes with VW GTi Tartan upholstery as standard.

We fit a two-seater RIB rock 'n' roll seat-bed in the rear and a Reimo front elevating roof, giving a spacious living space. The kitchen comprises light-weight furniture with Tristone worktops, sink with twin-burner hob and fridge freezer.

Since its launch the Ashton '94 has proven a very popular addition to the Autohaus family of campervans. It affords all the comfort and style of the standard Ashton model, but at a more affordable price.

KEY FEATURES

ASHTON

THE ULTIMATE IN LUXURY & STYLE

TIMELESS DESIGN

The Ashton was our first campervan model but has changed considerably over the years due to our continual desire to improve our campers.

Our furniture is made in-house by our team of skilled carpenters, using computer controlled machines to cut each panel precisely. Heat-bonded edges, flush-fitting cupboard doors, a curved fridge door with storage pockets and a range of materials make our stylish interiors a pleasurable environment to stay in.

We fit RIB rock 'n' roll seat-beds due to their supreme comfort, having a separate foam 'Sleeping Surface' on the rear of the upholstered 'Sitting Surface', ensuring you get a great night's sleep. These are available in a range of leather and fabric finishes to suit your taste.

The front elevating roof affords occupants extra head room in the kitchen and can house an optional 'Roof Bed' if required, making this an ideal choice for families.

The Ashton is the perfect campervan for daily use, weekend trips and longer journeys with your family.

SPARTAN

ESCAPE THE CROWD

SPACIOUS DESIGN

The Spartan was born from the success of the Ashton and was inspired by customers asking for more space; either wanting three seats in the rear or the comfort of a wider bed.

Using the RIB 129cm three-seater seatbed, this model comfortably and safely carries 5 passengers with full 3-point seatbelts.

The interior has also been designed to give a more open feel and provides unhindered views out of all windows. Great for taking in the scenery or tricky reversing manoeuvres!

The kitchen includes a sink and single burner hob for your morning cuppa plus a 50litre fridge. Perfect for keeping your refreshments cool and suitable for those who prefer al fresco cooking or dining at local pubs and restaurants. With the addition of the optional external BBQ gas point you can enjoy home cooking outside, with the luxury of more dining space inside.

The Spartan is the perfect campervan for daily use with the family, weekend trips and those who would prefer more space in exchange for less kitchen facilities.

CAMELOT

FOR ADVENTURES OFF THE BEATEN TRACK

FLEXIBLE DESIGN

The Camelot was developed for customers looking for adventure off the beaten track; the key to which being the provision of a flushing toilet discreetly located within the workspace at the rear of the vehicle.

This makes it perfect for camping away from traditional campsite facilities or when travelling with children who may need the occasional bathroom stop en-route. It also comes in rather handy when you want to avoid going outside on those cold, blustery nights!

Whilst using a different layout to the other models, the Camelot still incorporates kitchen facilities with sink, hob and optional oven/grill, allowing you to cook warm meals throughout your travels.

This model utilises twin seatbeds which can be configured as two single beds or converted into a full double bed. The central column table also provides an excellent dining area for four people.

With the option of a rear-elevating or hightop roof, the Camelot is a truly flexible campervan, allowing you to enjoy your camping adventures whilst providing you with the key comforts of home.

KINGSTON

A HOME FROM HOME... COME RAIN OR SHINE

SPACIOUS DESIGN

The Kingston is the largest member of the Autohaus campervan family and is based upon the larger L3H2 Fiat Ducato, providing more living space than its VW campervan counterparts.

This model was developed to provide customers with a true 4 berth campervan with 4 travelling seats and 3-point seatbelts (something that few manufacturers offer).

The Kingston features a fully sealed washroom with integrated sink and sealed aluminium door. This overcomes the need to use a shower curtain which is used in traditional campervans of this size.

The spacious layout also provides two separate seating areas, one in the front and one in the rear, both of which convert into double beds. The kitchen provides full cooking facilities which, along with the bathroom, are accessible at all times (day or night).

The Kingston suits those looking for a more spacious campervan that can transport and sleep 4 people as standard.

KEY FEATURES

4 Seats
with 3-Point
Seatbelts

4 Berth
Shower
Room

FEATURES

- Double glazed tinted windows fitted with blackout blinds and fly screens. Cab fitted with blackout blinds
- Two Roof Skylights with screen and fly nets
